...when and where you need it!

YOUR PARTNER IN SUCCESS...

In today's technology driven environment, organizations are only as good as their IT project and support teams. Mission critical positions left unfilled, for even the smallest amount of time, can result in missed opportunities, broken deadlines, and ultimately lost revenues. To stay competitive, it is important that you partner with a company whose "virtual bench" of specialized IT talent is ready and willing to join your team, making the immediate contributions you require at a moments notice. That company is KCM Solutions

KCM Solutions is a premiere provider of quality Information Technology solutions on-demand. To satisfy the varying needs of each client, we offer four placement strategies intended to provide a smooth integration into your existing work environment and corporate culture.

- **CONTRACT SERVICES** – We quickly staff your short-term and long-term projects, recruiting from our pool of talent who thoroughly enjoy the challenge of a new project.
- **DIRECT-HIRE** - Allowing you to focus on your core competencies, we assist you in filling your part-time and full-time positions by aggressively locating, evaluating, and delivering the best and brightest IT candidates in the industry.
- **CONTRACT-TO-HIRE** - Test the compatibility of your employee/employer relationship before making a long-term commitment by allowing candidates to work on a project-by-project basis first.
- **PAYROLL SERVICES** – We handle all employer obligations including salary, payroll taxes, worker's compensation, and liability insurance for all contract employees.
